

# Index to Volume 65

The index to Volume 65 is composed of three parts: a subject index, an author index, and an advertising index.

The primary index terms for each article are listed routinely in *AJHP* as "index terms" after abstracts. Items that were published in the ASHP Reports section, including official ASHP Statements and Guidelines, are indexed under "American Society of Health-System Pharmacists," as well as being covered by *IPA* in many cases. The subject index also notes all regular *AJHP* columns and, under the respective column headings, the titles of items in the

following: Alternative Therapies, Current Literature, Editorials, Frontline Pharmacist, Informatics Interchange, Letters, Management Consultation, New Practitioners Forum, News, Practice Spotlight, Pharmacy Abroad, Q&A, and Success Skills. The subject index also contains, under the heading "Correction Notices," the title and issue of publication of items for which corrections were printed, as well as the page numbers on which the corrections appear.

## A New Resource to Help You Meet Joint Commission 2008 Patient Safety Goals

### Safer anticoagulation therapy begins in the Pharmacy.

#### Improve patient care, meet safety goals with this comprehensive new guide.

Developed by ASHP in collaboration with Michael P. Gulseth and other noted experts, this is the tool you need to meet the implementation expectations of Joint Commission's 2008 Patient Safety Goal Requirement 3E: "...reduce the likelihood of patient harm associated with the use of anticoagulation therapy."

The guide and companion CD include:

- A step-by-step guide to setting up an inpatient service
- A review of anticoagulation medications
- Case examples of commonly encountered issues
- Customizable practice tools, references, policies, presentations, and competency exams

#### Exclusive Access to Additional Resources

Purchasers also receive access to a password-protected section of the ASHP website, which includes quick references, guidelines, and more.
